

JOBIX

AI AUTOMATION DIVISION

Cape Town AI Automation Candidates

Confidential Intelligence Report

Prepared: 8 March 2026

Source: HireInbox Intelligence Stack (GDELT + Shofo + LinkedIn)

5 candidates identified | Readiness to move assessed

Executive Summary

Jobix AI (like ElevenLabs) needs automation specialists who can help clients set up voice agents, wire API integrations, and deploy automation workflows. Using our intelligence stack, we identified 5 hands-on automation builders in Cape Town who match this profile.

Each candidate has been assessed for technical fit, readiness to move, and optimal approach strategy. Focus: API integration, voice/AI agents, workflow automation, CI/CD, and client deployment.

Candidate	Current Company	Signal	Priority
Craig Van	Adyen	HOT	Immediate
Shaun Egan	iiDENTIFIi	WARM-HOT	High
Lindsay Bell-Cedras	IQbusiness	HOT	Immediate
Sapokazi Maqoga	Zensar/Sanlam	WARM-HOT	High
Leroy Sharp	RealFi	WARM	Medium

Market Intelligence

Voice AI Market: 100+ AI automation jobs in Cape Town on Indeed. Voice agent demand surging.

Adyen CT Office: 3,000+ staff in Western Cape. Tech support roles -- engineers want to build, not support.

SA AI Salaries: R350K-R900K for automation engineers. Cape Town pays highest in SA.

Market Trend: AI agent/integration specialists are scarce in CT. First-mover advantage for Jobix.

Craig Van

Technical Support Engineer (Payments) | Adyen

HOT

<https://www.linkedin.com/in/craigvandotcom/>

Tech Stack

Voiceflow, OpenAI API, RAG, Python Flask, Chatbots, API Integration, Full-Stack Development

Background & Experience

- > Built AI chatbot using Voiceflow + OpenAI API + RAG with Python Flask backend
- > Technical co-founder -- developed chatbots and inventory management systems
- > Full-stack developer with AI, data pipelines, and process automation focus
- > Strong API expertise honed through payments integration work at Adyen
- > Side projects in ML and data engineering -- constantly building

Readiness to Move -- Signals

- ! Currently in a SUPPORT role at Adyen -- a builder stuck in support. Wants to create.
- ! Already building AI chatbots and voice solutions on the side -- this is his passion
- ! Technical co-founder experience -- understands startup pace and client delivery
- ! Voiceflow + OpenAI + RAG stack maps DIRECTLY to Jobix voice agent work

RECOMMENDED APPROACH

This is your #1 target. He is literally building voice agents in his spare time while stuck in a support role.
Pitch: "Stop supporting payments. Build voice AI full-time." He will bite.

Shaun Egan

WARM-HOT

Principal Engineer / Software Architect | iiIDENTIFii

[View LinkedIn Profile](#)<https://za.linkedin.com/in/shauneganza>

Tech Stack

Cloud-native Architecture, Microservices, AWS, Event-driven Systems, AI Tools, Python, CI/CD

Background & Experience

- > 15 years experience. MSc from Rhodes University
- > Principal Engineer at iiIDENTIFii (identity verification AI startup)
- > Ex-Director of Software Engineering at Deimos -- led large engineering teams
- > Built event-driven microservices and payments systems at Ifix (serverless AWS)
- > Drives adoption of AI-based tools and process automation

Readiness to Move -- Signals

- ! iiIDENTIFii is a niche identity verification company -- may want broader AI scope
- ! Has held Director-level roles -- senior enough to want meaningful product ownership
- ! Microservices + API architecture expertise = perfect for voice agent infrastructure
- ! Actively discusses AI-driven development on LinkedIn -- engaged with the space

RECOMMENDED APPROACH

Position as a technical leadership opportunity. "Architect the voice AI platform for Africa." His cloud-native and API architecture skills are exactly what Jobix needs at scale.

Lindsay Bell-Cedras

HOT

Automation Lead / Senior Developer | IQbusiness South Africa

[View LinkedIn Profile](#)<https://www.linkedin.com/in/lindsay-bell-cedras/>

Tech Stack

RPA (Blue Prism, Automation Anywhere), Process Automation, Project Management, IT Programming

Background & Experience

- > Automation Lead and Senior Developer at IQbusiness
- > Certified in Blue Prism and Automation Anywhere (dual RPA platforms)
- > Previously Automation Delivery Manager and Senior Dev at DigiBlu
- > Graduated with distinction in IT Programming from Varsity College
- > Also runs CreativeIdeas Cape Town (graphic design, photography)

Readiness to Move -- Signals

- ! IQbusiness is a consulting firm -- project-based work, no product ownership
- ! Consulting fatigue is real -- building a product is more compelling than client rotations
- ! RPA + automation delivery experience maps perfectly to client voice agent deployment
- ! Creative side (runs own design business) signals entrepreneurial drive

RECOMMENDED APPROACH

Lead with product ownership. "Stop consulting. Build the automation product." Their delivery management skills are gold for client onboarding and voice agent setup.

Sapokazi Maqoga

RPA Developer | Zensar Technologies / Sanlam

WARM-HOT

[View LinkedIn Profile](#)<https://www.linkedin.com/in/sapokazi-maqoga-8360ab104/>

Tech Stack

Power Automate, Power Apps, RPA, Workflow Automation, Process Integration

Background & Experience

- > RPA Developer at Zensar Technologies with Sanlam as client
- > Builds automated workflows and custom applications using Power Platform
- > Walter Sisulu University graduate, based in City of Cape Town
- > Streamlines business processes through intelligent automation

Readiness to Move -- Signals

- ! Working as a contractor (Zensar) servicing Sanlam -- no deep loyalty to either
- ! Power Automate / workflow automation skills translate directly to voice agent setup
- ! Contract/outsourced roles have natural churn -- timing could be right
- ! Enterprise automation experience at Sanlam = understands client deployment at scale

RECOMMENDED APPROACH

Pitch the product side. "Build automation that ships to thousands of clients, not just one bank."
Enterprise RPA experience + startup energy = strong fit.

Leroy Sharp

QA Engineer / Automation Specialist | RealFi

WARM

[View LinkedIn Profile](#)

<https://www.linkedin.com/in/leroy-sharp-027496b5/>

Tech Stack

Test Automation, CI/CD, Python, Full-Stack Development, Software Testing

Background & Experience

- > 6+ years of QA automation experience, specialising in framework design
- > Currently at RealFi -- DeFi/blockchain startup in Cape Town
- > Mancosa graduate, completed Elements of AI (University of Helsinki)
- > Full-stack development experience alongside QA automation
- > Self-motivated, creative problem solver with rapid environment adaptation

Readiness to Move -- Signals

- ! RealFi is a small blockchain startup -- crypto market volatility creates uncertainty
- ! QA automation + full-stack = can build AND test client integration pipelines
- ! AI training (Elements of AI) shows intent to move into AI space
- ! Building personal portfolio site -- actively investing in career growth

RECOMMENDED APPROACH

Position as a career upgrade into AI. "Your automation skills + AI = the future. Come build voice agents."
His QA rigour ensures client integrations actually work.

Next Steps

- 1. Craig Van**
Move NOW. He is building voice agents on the side while stuck in support. Perfect fit.
- 2. Lindsay Bell-Cedras**
Reach out this week. Consulting fatigue + product ownership pitch = compelling.
- 3. Sapokazi Maqoga**
Approach within 2 weeks. Contractor status = lower switching cost.
- 4. Shaun Egan**
Coffee chat. Senior hire -- position as CTO-track or Head of Engineering.
- 5. Leroy Sharp**
Soft approach. Career upgrade pitch from QA automation into AI voice agents.
